Champion Meat Market

Dennis Ashmore Passes Suddenly

The late Dennis Ashmore was born in Yorkshire, England, Dec. 6, 1899, and arrived in Fernie, B. C., with his parents when five years old. Three years later the family moved to Champion, where they have since resided. In 1925 he was married to Clara, daughter of Mr. and Mrs. Peter Daub, who with three small children survives him. The deceased had always been in robust health and until the attack of appendicitis which necessitated his removal to Calgary and the operation from which he failed to rally, sickness was unknown to him. He was widely known throughout the district, for the past few years having worked as a painter, and previously in the coal mine operated by his father. Of a happy disposition he was a general favorite and his removal will be felt as a distinct loss to numerous friends. His aged parents, seven brothers and one sister survive him in addition to his immediate family. These have the sympathy of the community in their bereavement.

The funeral took place on Monday, the service being held in the Community hall which was filled to the doors. Rev. S. R. Hunt officiated both in the hall and at the cemetery. A profusion of flowers added their mute testimony to the regrets of hosts of friends.

Tributes of flowers were received from: Mr. and Mrs. T. Moore, Mr. and Mrs. Geo. Rhodes, Mr. and Mrs. Peter Daub and family, Mr. and Mrs. F. M. Groves, Mr. and Mrs. Robt. Tyler, Mr. and Mrs. James Groves and family, Mr. and Mrs. A. Ferguson and family, Mr. and Mrs. Roy Lounheim, Mr. and Mrs. Victor Ferguson, Mr. and Mrs. L. Boden and family, Mr. and Mrs. W. S. Philpott and family, Geo. Neilson and family, Mr. and Mrs. Burland and family, Mr. and Mrs. Chas. Matlock and Mrs. John Matlock, B.P.O. Elks, Champion, S. Fath and family, J. Beingsenier and family, Mr. and Mrs. Carlson and Ed. and Mary, Mr. and Mrs. F. Wise and family, Mr. and Mrs. H. Higgins and family, Mr. and Mrs. James Walker, Mr. and Mrs. James Ellis, Mr. and Mrs. D. W. Harper, Mr. and Mrs. W. McRae, Cleverly Pioneer Club, Homer Howerton and family, Mr. and Mrs. Louis Fath, Mr. and Mrs. Earl Ditto, Champion Ladies' Aid, Jack Douglas, Royal Purple Lodge, Champion Women's Institute, Mr. and Mrs. Wm. Ellis and family, Mrs. T. and Mrs. F. Sisson, Dr. and Mrs. Freese, Mr. and Mrs. P. Larkin and family, Mr. and Mrs. W. S. Ryan, Amity Club, Mr. and Mrs. Mifflin and Patterson Bros., Mr. and Mrs. Clark Rhodes, Mr. and Mrs. W. F. Bozarth, Mr. and Mrs. Wm. Ulrich and family, Mr. and Mrs. Guy Walker, Bill Rhodes and family, Mr. and Mrs. Guy Dow, Lyman and Sam Joelling, Mr. and Mrs. L. M. Groves, Wife, Father, Mother and family, Bob, Daze and families, Mr. and Mrs. J. M. Moffatt, Sister and Mother, J. A. Ruschall and family.

Card of Thanks

The relatives of the late Dennis Ashmore wish to thank all those who so kindly rendered assistance at the funeral by supplying automobiles for the occasion, the directors of the Community Hall for the use of the building, and the many donors of beautiful flowers.

TRACTOR SCHOOL GOES OVER BIG

The I. H. C. tractor school is being very largely patronized and unusual interest in this product has been aroused. Wednesday was the first day of the school and the Community hall was filled by interested farmers. Mr. Depe is to be congratulated on the outstanding success being achieved in this instance.

High School Lit. Featuring Debates

The next meeting of the High School Literary Society will be held on Friday, February 14th, at 2 p.m., in the United Church building. The main feature of the program will be a debate between the representatives of Grades IX and X. The subject is "Resolved that the people of the North American Continent are too fond of sport and amusement." The affirmative is taken by Gretchen McNaughton and Thomas Alder, representing Grade X, the negative by Jean Gardner and Theodore Holm, representing Grade IX. This is the second of a series of debates. The first was "Resolved that the world is growing worse," Aileen McCullough and Helen Holm, representatives of Grade XI, taking the affirmative, and Donald Stephenson and Donald Bond, representatives of Grade XII, taking the negative. The judgment was given in favor of the affirmative. The next debate will be between the winners.

It would be appreciated if any parents or friends who are interested would attend.

Will Hold Dance Friday, March 14

The Order of the Eastern Star have arranged to hold a dance on Friday evening, March 14th. Special music is being arranged for this occasion and a big evening very confidently anticipated.

O. R. P. Prepare For Valentine Dance

The Ladies of the Royal Purple will hold a Valentine dance in the Community Hall on Friday evening, Feb. 14th. The program will include the Lucky Heart waltz, breezy fox trots and snappy one-steps. A five piece orchestra will supply the music.

Card of Thanks

Mrs. Dennis Ashmore wishes to thank the Women's Institute for the lovely plant sent her during her recent illness, and C. W. L. for the lovely plant sent to Dennis while in the hospital.

Card of Thanks

Miss and Mrs. Walter Willies wish to thank the many friends for their kindness and sympathy during their sad bereavement, also all who sent flowers.

Elk's Installation Brilliant Affair

Installation of officers for the ensuing year for Champion Lodge, B.P. O. Elks was held in the Community Hall on Tuesday evening, John Vanculak of Lethbridge being installing officer. Following the ceremony of installation one of the most pleasant social evenings in the history of the order was spent, dancing continuing until an early hour, music being furnished by local talent. Visitors were present from Vulcan, Lethbridge, Carmangay and other points.

A rink consisting of C. McLean skip, and A. Woodhull, N. McLeod and Nels Running are at the Banff hotel and when last heard from were in the jewellery class in one event at least.

NOTES AND COMMENT.

The prolonged Chinook winds and warm weather have given everything the appearance of spring. Kites have been flying in every direction, many of them winding up in telephone wires. Machinery is arriving in car-loads and everything has spruced up accordingly. The streets are filled with cars daily and the depression of the winter months has disappeared as if by magic.

World production of wheat, lumber, newspaper, coffee, sugar, cocoa, rubber, wool, and many other commodities, has exceeded consumption. The available capacity and economies for the production of iron and steel, automobiles, textiles, and many other manufactured products is substantially in excess of that warranted by volume of demand. If one considers a single commodity such as sugar, or the position of a single industry such as automobile manufacturing, the situation within that particular industry may seem self-explanatory. It may be true that there is a greater production of lumber or coffee than the world can use, but when it is found that substantially the same facts are simultaneously true concerning commodities as diverse as copper, wheat and textiles, and the others mentioned above, the assumption seems justified that world buying power is not being maintained at a satisfactory level. Although over-expansion in a single industry is a matter for correction within the industry where over-production becomes general in many lines, that fact constitutes prima facie evidence that it is the price structure which in turn is governed by the monetary situation, that is at fault. When most of the countries of North and South America and Europe find that a large proportion of their major industries are on the verge of depression, there is no hope in the dictum that workers must seek employment in less congested industries and that the surplus plants must be adapted to new uses. There are no industries in the position to receive such an overflow.—Royal Bank Letter.

Best Barley

For Sowing

(Experimental Farms Note)

There is no one best variety of barley for Alberta. The variety recommended will depend on the needs of the grower. The varieties available vary in yield, length and strength of straw, and quality of threshed grain; hence the variety to recommend must be governed by the district in which it is to be grown, the kind of soil and whether the threshed grain is to be used for feed, or for malting in Canada, or in Great Britain.

O. A. C. No. 21 is recognized as the standard brewing barley for the Canadian trade. It has a long straw, of fair strength, and is a good yielder. The Canadian Brewers offer a premium for well matured, plump, bright grain of this variety that is free from impurities. Growers who are considering barley production for the brewing trade would be well advised to use this sort. It is also an excellent feed variety.

Trebi has consistently been one of

A Want Ad. Will do it

Cheap and Effective.

the heaviest yielding barleys tested at the Dominion Experimental Station, Lacombe. It has a straw of medium length and strength. The grain tends towards coarseness and is not favored by Canadian brewers. In view of the prejudice against it by Canadian brewers, it would seem that the production of this barley should at present be considered mainly from the feed standpoint.

The two-rowed barley, individually and as a group, produce very fine appearing samples of threshed grain which is plump and high in feeding value. As a class they do not yield as well in this province as do the six-rowed sorts.

Canadian Thorpe and Duckbill are two outstanding varieties of two-rowed barley. These varieties have

stronger straw than any of the six-rowed sorts now available in the seed trade. Canadian Thorpe will slightly outyield, but has slightly weaker straw than Duckbill. These varieties are only fair yielders, but it is possible that, because of their strength of straw, they may have a place on strong land where other sorts lodge badly.

Hannchen is another two-rowed sort that will usually outyield both Canadian Thorpe and Duckbill here. More O.A.C. No. 21 is grown than of all other varieties combined, but the other varieties mentioned are well worth of a trial.

Canada Is Largest Exporter Of Wheat In The World and Ranks Second In Production

In the comparatively short period of three-score years, Canada has emerged from an insignificant position in world production to that of the largest exporter of wheat, and ranks second (excluding the Russian Soviet Union), as a producer of wheat, raising, on an average, about ten per cent. of the total world production, only the United States exceeding Canada in this regard.

Wheat and flour were exported from the Dominion during the crop year 1928-29, to nearly 80 countries, the total amounts being 354,424,699 bushels of wheat, and 13,908,773 barrels of flour. Total world exports of wheat and wheat flour, expressed in bushels of wheat, amounted to 1,062,430,000 bushels for the 12 months ended July 31, 1928, of which Canada contributed over 40 per cent.

The British Isles took 269,571,743 bushels of Canadian wheat and 2,637,867 barrels of flour, more than one-half of the total production. Japan was the Dominion's next best customer of wheat with 22,700,487 bushels; the Netherlands were third with 22,121,880 bushels; Belgium fourth with 15,577,716 bushels; Italy fifth with 15,073,131 bushels, and Germany sixth with 14,603,724 bushels. Other purchasers of Canadian wheat are widely scattered throughout the world.

China was first in the list of consumers of flour with 3,040,667 barrels, surpassing the British Isles which took 2,637,867 barrels so also, where many stood third with 1,997,285 barrels.

Flour produced from the crop of 1928 made a new record for the flour milling industry in Canada. During the crop year 1927-28 this was an increase of over 7,650,000 bushels. Flour produced amounted to 20,883,232 barrels as compared with 18,910,364 barrels for the previous year. This increase amounted to 1,972,868 barrels of flour.

During the same period exports of wheat and flour amounted to 13,908,773 barrels, and 9,865,745 barrels respectively. The increase in exports was 1,945,021 barrels, or practically identical with the increase in flour production.

During the crop year 1928-29, Canada made new records in the production and export of wheat and in the manufacture of wheat flour. In addition to her position in the "wheat field," Canada produces nearly ten per cent. of the world's oats, and ranks eighth in cheese production, and fifth in that of butter.

Contests Canada's Claim

South Africa Says It Has World's Record Milk Producer

South Africa is contesting the claim made in a cable from Ottawa that a Canadian Holstein cow, "Teake Waldoor" is the world's record milk producer. South Africans claim an Orange Free State cow, "Butterfly," produced no less than 30,004 pounds of milk in 365 days, containing 1,254 pounds of butter. The yield is verified by an official government test. Furthermore, there are a number of other cows in South Africa which have surpassed "Teake Waldoor's" record. It is stated.

Industrial Manitoba

"General conditions in Winnipeg are extremely satisfactory and the outlook very promising," said President Edward Anderson, K.C., of the Winnipeg Electric Company. "Manitoba is fast becoming an industrial province; its industrial output in 1928, and to a greater degree in 1929, being larger than its agricultural output."

"I shall we escape from the dull company" "I can't I am the host."—Hummel, Hamburg.

W. N. U., 1929

Old Timer Retires

Back in 1882 when the Canadian Pacific Railway was pushing through the bush in Northern Ontario on its way across the continent, this old-time figure did a lot of good work and it was first for James T. Fallon, who had joined the road three years previously. On the last day of 1926, Fallon, for over forty years an engineer, closed more than fifty years of railroad service. His picture is inset with that of the old locomotive, No. 222, sister to the one on which he worked as a youth.

Grain Elevators In Operation

Saskatchewan Has Four Thousand According To Recent Check

More than 4,000 grain elevators are now in operation in Saskatchewan, according to a check made by G. T. Thomson, who conducted the first inspection of such facilities, a new activity inaugurated as a preliminary to the operation of the new Workmen's Compensation Act. All the modern elevators were found to be provided with safety devices, the first report revealed, though some of the older ones were found to be in need of additional protection equipment.

The man who deals in sunshine. In the man who gets the crowds. He does a lot more business. Than the one who peddles clouds.

The saddest news of the week in the United States is that you will find the Navy to see the world and spend four years in a submarine.

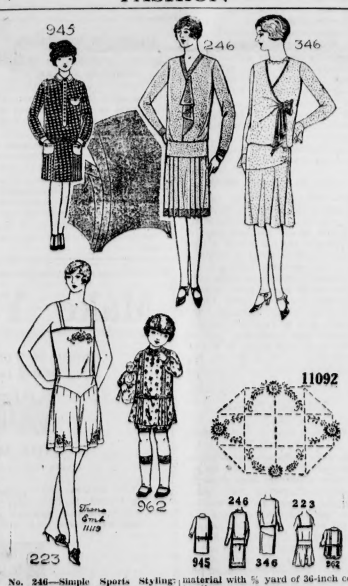

Canada Popular With Tourists

About Nine Million People From U.S. Visited Dominion Last Year

The growing popularity of Canada among tourists is indicated by the recent official estimate that about 9,000,000 persons from the United States visited the Dominion last year. Of this number 250,000 visited the national parks of Canada. Canada maintains 22 national parks and reserves located in different parts of the country with a total area of over 28,000 square miles. In these parks the outstanding natural beauties and wild life are presented. Hunting of game is forbidden and any visitor entering one of the parks or reserves with a gun must submit to having it sealed before entering.

"Prisoner, the jury finds you guilty." "That's all right, Judge. I know you're too intelligent to be influenced by what they say."

Regulations Governing Oil And Gas In Turner Valley Recommended By Commission

Sowing Discarded Wheat

Is Likely To Result In Decrease In Yield

The results of experiments carried on at the Dominion Laboratory of Plant Pathology, Saskatoon, indicate that it is a very serious practice to sow wheat that is discolored or abnormal. The germination of blackened kernels is anywhere from 10 to 25 per cent. below normal, and the plants which result from the ones which germinate are very often weak and stony in appearance, and die before maturity, resulting in a decrease in yield.

Judging from numerous samples of seed wheat sent to the laboratory from widely separated parts of Saskatchewan, the percentage of discolored and blackened kernels is, in some cases, quite high. If the practice of sowing these is continued the results may, in time, become serious to successful wheat growing. By sowing such wheat, the farmer gives these fungi a chance to become established in the soil, and when they live for years. It is very much easier to prevent the cause of the diseases of wheat by sowing the best seed obtainable, than to try to control the disease when they are once established in the soil.

B.C. Shipping Trade

Remarkable Growth Is Shown In Figures Presented By Government

Increase in the shipping trade of British Columbia since the year 1876 is shown in a series of tables appearing in the British Columbia Manual published by the B.C. Government through the Bureau of Provincial Information. The leading table shows that the deepest and coastwise tonnage of 21,809,731 and coastwise tonnage 27,427,186. Another tabulation gives comparisons of the number of ships entering and leaving British Columbia ports. In 1911 there were 5,587 inward and 5,713 outward ships, and in 1928 there were 9,336 inward, and 9,408 outward ships in the sea-going class. The inward tonnage in 1914, was 2,50,397, and the outward 5,329,776.

Life-Size and Natural

Figures on Building In Montreal Looked Local Revels

There is a financial institution in Montreal which has built some years ago in the grand manner. High above its portals is a ledge on which are placed life-sized stone figures representing various legendary individuals. It has no happen that construction work is being undertaken nearby, and the steam from an engine occasionally wreathes the adjoining building in smoky mists.

On the day before Christmas a reveler passing by looked up at the stone carvings, and no doubt confused by the clouds of steam which surrounded them, shouted loudly, "Here it jumps, boys, the firemen will be in a minute!"—Financial Post.

Luck Is Only Secondary

Man Must Show Ability In Order To Succeed

(Mr. Snowden says that no man succeeds who never takes the opportunities offered him; and the unhappy man cannot be a successful man.) Can mere "luck"—whatever it may be—make a man successful? It may lead a pure mediocrity to great place and even apparent power. But if he is only a mediocrity he will not long retain the place, and he will never be able really to exercise the power. Has he then "succeeded"? Again, the successful man must take his opportunities yes, but often more than he must make them, too.

Canada's Progress Phenomenal

Characterizing Canada's development during the twentieth century as relatively the most phenomenal the world has ever known, exceeding even the unprecedented development of the United States in the nineteenth century, Col. J. H. Woods, Calgary, president of the Chamber of Commerce, delivered an inspiring address on the country's future development at a banquet of the Woodstock Board of Trade.

Applaud: "May I count on your support in the future?" "Citizen: 'Are you running for office, or do you want to marry my daughter?'"

Adequate regulation of the production of oil and gas in Turner Valley is recommended by the conservation commission appointed last year by the Federal Government.

The commission has reported to the government and the report has been made public. The members of the commission were Dr. Charles C. Mitchell, deputy minister of mines, A. W. G. Wilson, Charles Ross, R. C. Wallace and A. A. Carpenter.

After pointing out that the wastage of gas in Turner Valley now approximates 200,000 cubic feet per day, was equal to 8,000 tons of high grade coal, the report states the position as follows:

"It is obvious that in the Turner Valley operations are rapidly and wastefully dissipating a great natural resource only about 10 per cent. of which is usefully employed. This wastage takes place through the operations under license of about 40 producing companies. It is probable that the number of producers will be increased shortly and that the waste also will increase. Only about 30 per cent. of the area is operated under government license. The remainder is operated by about 70 per cent. having been alienated from the crown many years ago."

"These producers are primarily interested in obtaining as great a return as possible in as short a time as possible. No voluntary steps of consequences have been taken to curtail wastages or to prolong the life of the wells. While it may be to the advantage of the individual producer to obtain quick return it should be redrafted to meet the national interest, or in the ultimate interest of the purchaser himself to permit this rapid dissipation without utilization of a great natural asset for the immediate benefit of a few."

"The only solution which will mitigate this position is in recognition of the fact that Turner Valley is a gas field and the formulation of rigid regulations for the purpose of controlling all phases of the mining and production of the gas producing industry. If existing legislation is not adequate to protect the public interest it should be redrafted to meet the situation. These regulations should be administered uniformly by one body representing both federal and provincial parliaments. This is the first and most important step to be taken. Other measures can only be palliative."

This action is also a prime essential to the further development of industries based on the presence of this gas supply. Also, it is a prime essential to the conservation of the gas supply. Without regulation and without control of production, industries cannot be assured of an adequate supply of gas over a period of time long enough to warrant essential capital investments. New supply is not only to be found in the new oil fields, but also to investment in manufacturing industries using natural gas and to the development of a chemical industry based on chemical and metallurgical research. If adequate regulation is provided a limited industrial development will result."

Saskatoon Exhibition Surplus

Date of Exhibition For This Year Fixed For July 21 to 26

A surplus of \$10,667.23 is reported by the Saskatoon Industrial Exhibition Board covering operations in 1929. This is considered very satisfactory in view of crop conditions at the time of the fair. The year featured large increases in exhibits of livestock, agricultural and industrial products, and the record of the buildings in the grounds. This year the date of the exhibition is fixed for July 21st to 26th.

The western winter when measures less than four inches in the tip of the back to the end of its upturned tail.

Whisper spout air from the lungs three to ten times, then run submerged for ten minutes or longer and repeat.

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—a truly a tasteless dose of water. It is pleasant, efficient, and

harmless. It has remained the standard with physicians in the 60 years since its invention.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 60 years in correcting excess acids. Each bottle contains full directions—any drugstore.

built in the days when most Wickfield dwellings were set flush with the sidewalk. Charnian's great-grandfather had explained (when curious neighbors commented on this fact), that he was unwilling to sacrifice the young elm tree but most of his questioners suspected that the underlying reason for this unusual proceeding was because great-grandfather Davis "hated dust."

This, at least, was the story that came down to Charnian, who declared that if her great-grandmother could have foretold the dust of the present day with automobiles passing at forty miles an hour, she would have set her manion in what was then the cow pasture!

"If she had," commented Grandma Davis wisely, "it wouldn't have been near so handy for the shop."

Charnian smiled. The shop, which was once the honored parlor of the old Davis house, was an innovation against which Grandma had rebelled when it was first suggested by Charnian's widowed mother. At that time Charnian was but a little maid of six, yet she remembered vividly the battle that took place between Grandma Davis and her mother over the new shop.

Charnian turned, dropped her polishing cloth and took a seat on the stool.

"I suppose it does; but somehow I don't mind it—this such a beautiful house. I like to remember that my father and grandfather were born here, where I was born myself. This old house seems—well—perhaps you'll laugh at me, Doctor, but the house seems just as much a part of me as do my ancestors."

The doctor didn't laugh. He looked up at the shining brass knocker on the door, put three fingers together before her, and then, with a gentle gesture, he pointed to the small-paned windows of long ago. Then his glance strayed from the century-old sign at one corner of the house to the mammoth spruce bush (the pride of the village as well as of Grandma Davis), at the other, and he understood and sympathized with the girl's loyalty to the home of her forefathers.

Charnian was right. It was a beautiful old house. It stood a far road from the street, though it was

against which she had fought so valiantly, because her greatest source of entertainment.

Charnian was fifteen when her mother died, but she managed to finish high school, to go to the State Normal at Eastboro, and keep house for Grandma, while the old lady sat contentedly in the front window and waited on occasional customers. Unless, as was usually the case, they waited on themselves. Indeed the Davis house would hardly have seemed so natural without Grandma's face peering from behind that twenty-four-year-old, Emma Bascomb had offered to put a whole pane of glass in the lower sash, so she could see the passing traffic.

"I could do it easy enough some holiday," he urged; but the old lady shook her head.

"It's real kind of you, Ezra," she said gratefully, "but my husband's grandfather, Luther Davis, built this house, and I've never felt called to want it changed. Seem as if one pane of glass wouldn't exactly suit it."

It was a proud day for Grandma Davis. She was a proud day for Grandma Davis. She was a proud day for Grandma Davis.

well as alone, to let his horses rest when they should have been dragging the plow, while he feasted his beauty-loving eyes on the hills that surrounded Wickfield on every side, and composed "poetry."

Grandma was very proud of Grandma's poems. One of them was printed in the Eastboro "Telegraph," and the minister read it from the pulpit. That was a proud day for Grandma Davis. She still kept a clipping of the poem between the pages of her Bible, and she lived in a great joy when she said her prayers. To her loyal heart it was a legacy more beautiful than gold or precious stones.

And now, though she and Charnian were left alone in the big house, it never occurred to them to leave it. To Grandma it was "home." To the girl who had lived in a small house built by her grandfather, it was a source of pride. For it was not something to be proud of, but a source of pride. For it was not something to be proud of, but a source of pride.

Has Long Railway Experience

H. H. Melanson has been appointed assistant traffic vice-president, Canadian National Railways, with headquarters at Montreal.

The boundary between Alberta and Saskatchewan is the Fourth Meridian of the Dominion Lands survey system, which coincides approximately with the 110th meridian of west longitude and under instructions from the Bureau of Geographical Names, the territory has been surveyed from the International Boundary northward to Lake Athabasca, a distance of a straight line of nearly seven hundred miles, constituting one of the longest surveyed straight lines in the world.

Miller's Worm Powders will eradicate the worm evil that bears so heavily on children and is believed to cause many fatalities. They are an excellent medicine to children and can be fully relied upon to clear the system of the scourge of these destructive parasites and restore the infirm and painful patients to health and vigor. It is an excellent remedy for these evils.

Cost Of Translations

French and German Cheapest, and Finnish Is Dearest

Language experts should find something to interest them in the tariff of a translation. I have just been looking over, writes "Looker On" in the London "Daily Chronicle," French and German, it seems, are the cheapest languages to translate. Italian and Spanish are a little dearer, and Dutch and the Scandinavian languages come next on the list of charges. Greek translations cost considerably more than Russian—they rank in cost with Rumanian, Hungarian, Serbian and Czech. Lithuanian comes next, while Finnish, "dearest" language of all, costs about eight times as much as French.

Quarry Should Be Marked

Stone For Isle of Centaph Taken From England's Centaph

The stone from which England's famous Centaph is hewn was quarried in the Isle of Portland, Dorsetshire, south of Weymouth, projecting into the English Channel, terminating in the Bill of Portland. The quarry is situated at the lower end of a long, quiet, straggling road named Walcham Street. The little quarry is now worked out, its lifting gear dismantled and taken elsewhere. In course of time its situation may be easily forgotten unless marked in some way. Meantime, red poppies in their season bloom luxuriantly among the debris.

Calgary's Building Permits

Calgary's building permits for the year ended March 31st and had a recorded value of \$11,417,194, compared with \$84 in 1928, with a value of \$6,302,142 for 1928.

Plan for the cleaning, gutting and freezing of fish will be set up in Edmonton shortly, according to "The Journal."

For Roger Davis, who is a lawyer—a man of education. His office, a small, one-story building, still stood across the drive that led to the big barn. He had been with the law firm for many years, and he was called "a scholar and a gentleman," but although he sent his son to college, "Grandpa Davis," the year of reading law in his father's office, had gone back to the land; and being more of a dreamer than a worker, he left the old place rather worse off than when he left her to it. For he had found it pleasant as

DON'T SUFFER WITH DANGEROUS INDIGESTION

Do you suffer after meals with a belching, from sour and acid stomach? May be relieved by heart trouble and tremble with fear, expecting any minute to drop dead. Indigestion can be prevented, likewise relieved.

Take Carter's Little Liver Pills after meals and neutralize the acids. Sweeten the sour and acid stomach, relieve the gas and bloat, and give the stomach, liver and bowels will be cleared of poison, every night and dangerous indigestion disappears and the system enjoys a tonic effect. Don't delay. Ask your druggist for a 30-day pack of Carter's Little Liver Pills.

Whaling Up-To-Date

Airplanes Bring Up As Scouts By Norwegian Fleet

A Norwegian whaling fleet now at work off the ice banks of the Antarctic is accompanied by three aeroplanes which are being used to scout for schools of whales. It has been found that in certain years the whales are more numerous than in others; in fact, they seem practically to disappear, and it is hoped that the aeroplane with its greater mobility and wide range of vision will be able to help in solving the problem. The machines can be equipped with three sets of landing gear—wheels for landing on the deck of the "mother" vessel, pontoons for the water, and skis for the ice. A wireless "there she blows" will summon the fleet when the aeroplanes find their quarry.

If There Is A Baby In Your Home

There Also Should Be A Box Of Baby's Own Tablets

For every little one well is the constant aim of every mother and to help her in this task she should add a box of Baby's Own Tablets to the medicine chest. These Tablets have been made for little lives that come on suddenly.

For every one of troubles which afflict little ones are those which arise from a disordered condition of the bowels. It is quick in correcting these disorders that Baby's Own Tablets show their value. They banish constipation and indigestion; correct colic and flatulency; break up colds and simple colds; soothe teething pains; and cure the little one's troubles. The Tablets are known as "Baby's Own Tablets" because they are made for little ones.

The Tablets are sold by medicine dealers in all parts of the world. They are sold from Dr. Williams' Medicine Co., Brockville, Ont.

Edmonton Has Fine Display Of Northern Grasses and Grasses

Grass, 800 miles north of Edmonton, as the crow flies, at the Dominion Experimental Farm, at Fort Vermilion, Alberta, on the Peace River, a most remarkable display of grasses and grasses of last season's crop are on display at the Edmonton Chamber of Commerce.

Exhibits include thirteen varieties of wheat grown in experimental plots; eight of the varieties of barley, two of flax and two of rye. The wheat includes such well known varieties as Garnet, Red Fife, Marquis, etc., and the oats include Banner, Leader, Victory and two varieties of hull-less oats—Laurel and Liberty.

Grains of the 13 varieties of wheat sown April 30, the other, Marquis, May 8. Three of the varieties were cut August 15; significant that Marquis, sown eight days later than all the other varieties ripened as rapidly as the others sown eight days earlier.

All samples are of excellent quality, with strong root growth, sturdy stands and plump, well-filled heads, with heads ripened perfectly.

Exhausted From Asthma. Many who read these lines know the terrible drain upon health and strength, which comes in the train of asthmatic troubles. Many do not realize, however, that there is one true remedy which will usually stop this drain. Dr. J. D. Kellogg's Asthma Remedy is a wonderful cure for this distressing ailment. It has a countless record of cures. It is sold almost everywhere.

Measured The Earth

The earth is not round after all. It is flattened at the poles, and has quite a pronounced hump in the middle. A. H. Miller, a Canadian scientist attached to the Dominion Observatory, in Ottawa, has completed a series of measurements which show the diameter through the poles is 20 miles less than through the equator.

Was In Bed All Summer

"I have to work in the store and do my own housework, too, and I can't get out of bed. I have been in bed nearly all summer. The least noise would make me nervous. I was told to take Lydia E. Pinkham's Vegetable Compound and I have taken seven bottles. It has made me stronger and put more color into my face. I am looking after my store and housework and my four children and I am getting along nicely now."

—Mrs. J. Malin, R. R. No. 3, Barton St. East, Hamilton, Ontario, Canada.

Lydia E. Pinkham's Vegetable Compound

The weekly catch of herrings of Yarmouth, England, exceeds 300,000,000.

Needless Pain!

Don't be a martyr to unnecessary pain. Lots of suffering is, indeed, quite needless. Headaches, for example. They come with my warning, but one case always is prepared. Aspirin tablets bring relief. Keep a small tin in your pocket. Then you won't have to hunt a druggist, or wait till you get home.

And do not think that Aspirin is only good for headaches, or colds, or fever. Read the proven directions for relieving neuritis, neuralgia, rheumatism, and other aches and pains. Remembering, of course, that a quick comfort from these tablets is not a cure; for any continued pain, see a doctor.

Purchase genuine Aspirin. Protect yourself by looking for the name, Bayer, on the wrapper. Always safe. Never hurts the heart.

TRADE MARK REG.

REQUEST DOTTED AS TO ASSIST WITH RELIEF MEASURES

Winnipeg. — The government of Canada will be approached by a delegation from western Canada, seeking cessation of unemployment difficulties. It was decided at the closing session of a two-day party representation of cities, provinces and municipalities in the west, Monday, that deputations' requests will be formation of a scheme of unemployment insurance and decision by the Dominion Government to bear a share of unemployment relief expenditures.

An inter-provincial and Dominion conference should be called at the earliest possible moment for consideration of some Dominion-wide scheme of unemployment insurance. The conference should be called, it was pointed out that a Dominion conference had approved the scheme, but that law officers of the Crown and opinion that under the British North America Act the Dominion Government cannot inaugurate such a plan.

In the opinion of the meeting, the Dominion should bear one-third of unemployment relief costs, on the basis of agreements entered into in 1921 and 1922, and confirmed in 1924, provinces and municipalities, or cities would divide equally the other two-thirds. The Dominion conference has contended that their stand was based on the agreement of 1927, by which unemployment was labelled a provincial matter but that conference held that the 1927 situation was not parallel to that now existing.

Every city from Lake Superior to the Pacific coast, and every province and government delegates to the party attended from British Columbia, Saskatchewan, Alberta, Manitoba, Ontario, Quebec, and the Atlantic provinces. Unable to send a representative, due to the opening of the Alberta legislature, Premier J. E. Brownlee telegraphed to the conference. Saskatchewan, Premier J. E. Brownlee telegraphed to the conference. Saskatchewan, Premier J. E. Brownlee telegraphed to the conference.

Prime Minister J. H. Mackenzie King has stated that the Dominion Government would be prepared to consider the unemployment question, with a view to remedial measures, if the provinces of Canada join together in admitting they are unable to cope with the problem.

Delegates will return to their respective areas and ask the bodies they represent to agree that resolutions be sent to Ottawa. The delegates will then notify Mayor Ralph H. Webb, Winnipeg, that the Dominion government will set the date of the pilgrimage to the capital. Governments of the four prairie provinces, as well as of Ontario, will be asked to dispatch representatives as members of the delegation.

Wheat Pool Conference In London, England

Canadian Pool Representatives Meet
Rt. Hon. A. H. Thompson, Lord Privy Seal

London, Eng.—Preliminary discussions in which the threats of the conference of Winnipeg, last year, were taken up, was heard recently between Rt. Hon. J. H. Thompson, Lord Privy Seal, and representatives of the Canadian Wheat Pool on the question of regulation of Canadian grain exports to Britain and establishment of grain elevator in the country. A. J. McFarlane, of Regina, pool president; W. A. McLeod, of Winnipeg, publicity director; and D. H. McIntyre, eastern sales manager, attended.

The meeting was in Mr. Thompson's room in the Parliament Buildings.

Extradition Not Warranted
Los Angeles.—W. R. MacKay, arrested here recently at the request of Canadian authorities for alleged illegal transportation of machine guns across the Canada-United States border, has been released by the United States commissioner's office. The commissioner ruled that Canadian authorities had not established sufficient cause for extradition of MacKay. He was sought at Vancouver.

Prince Studying South Africa
Cape Town, South Africa.—Notwithstanding the fact that during his stay in Cape Town, the Prince of Wales is spending the nearest thing to complete holiday that he has had in years, he is devoting considerable time to increasing his knowledge of South Africa, his main interest and problems.

W. N. U. 1023

Great Future For Canada

Sir Esme Howard Refers To
Dominion's Envious Position

Ottawa.—A suggestion whereby Canada trade may be enlarged with West India, a tribute to Hon. Vincent Massey, Canadian minister at Washington, and an expression of confidence in the future of this country were the features of an address delivered before the Canadian Club here by Sir Esme Howard, British minister at Ottawa.

With regard to the Canadian minister at Washington, the British ambassador said that from the day Mr. Massey was appointed to the post there had never been a shadow of any sort between them.

"We have discussed matters of common interest and matters of all kinds so freely that we have become friends and almost as brothers. But I should like to say this, that the establishment of the Canadian legation at Washington, so far from creating a shadow, has only increased the confidence of the British Commonwealth, as some persons supposed, has on the contrary been a real help and assistance in the conduct of those affairs in the United States."

Expanding his theme on Anglo-American relations, Sir Esme pointed out to Canada's envious position in having on its frontiers no hostile neighbor.

"Some think that the North geographical situation of Canada is a drawback, but I don't think so. It is a great asset. It ensures you for ever from the danger of the problem of mixed races, which is the most serious one in southern countries; and it ensures you also from the relaxation of mind and muscle which often is the result of too constant contact with the sun god. You are endowed with thousands of thousands of square miles of fertile plains, with millions of horsepower of electricity waiting to be harnessed, with lumber and wool pulp almost incalculable, and lastly with a wealth of mineral deposits which have yet only begun to be scratched. You are not only rich, but you have also the unspicable blessing of political security without fear from outside."

"Who are your neighbors? On one side the North Pole, whose bears are not likely to prove a danger to the estate; and on the other side a great and friendly country, with whom there has for a century been an arrangement by which armaments were laid aside and the frontier line was left almost as free from danger as those between one state and another of the United States."

Authorities Firm On Mennonite Question

Canada Will Not Permit Entry During
Winter Months

Ottawa, Ont.—The attitude of the Canadian authorities with regard to the admission into Canada of the 6,000 distressed Mennonites in Germany will be unaltered, and no permission will be given to bring them to this country during the winter months. This was stated by officers of the immigration department here. In the spring the department will give consideration to the case of these Mennonites, but no special privileges will be extended to them. Any action taken will be in conformity with the immigration laws and will be governed by the agricultural requirements of Canada then.

Motorist Was Rewarded

Ottawa, Ont.—Wilfrid Lebel, young Ottawa motorist, brought a party of skiers home from the Gatineau Hills when their car broke down on Sunday. He was surprised when members of the party asked to be dropped off at Government House. He went home and forgot about it until he received a letter of thanks from Her Excellency Viscountess Willingdon, accompanied by a handsome bouquet.

Pictures Are Proof

Toronto.—Heloise Burp, a young Dane, who in three years became a successful farmer in Northern Ontario, has left to spend a holiday in the land of his birth, and in his baggage will be 5,000 feet of film which will show in their parts of Denmark as pictorial proof that splendid opportunities exist for those who are not afraid to play the part of pioneer.

To Speak Over Radio

London, England.—Lady Astor, Conservative member of the House of Commons, will broadcast over radio to Canada and the United States during about a week. Her address will be designed primarily for women and will urge them to continue their efforts for world peace.

Copied Was Clever Forgery

Expert Investigation So-Called Draft
Of U.S. Declaration Of
Independence

Toronto.—Paint pencil marks discovered by a handwriting expert left no doubt that the so-called draft copy of the United States Declaration of Independence, now in Toronto, was a hoax, says the Mail and Empire in a news story.

"One of the cleverest forgeries ever committed," said the expert, "had completed his investigation. A powerful magnifying glass brought to light the marks of a pen and pencil, the paper, these markings indicated, the expert said, that the signature had been carefully drawn then inked in."

MAY EFFECT BIG REDUCTION IN NAVAL STRENGTH

London, Eng.—Rt. Hon. A. V. Alexander, first lord of the admiralty, told the House of Commons that Great Britain's cruiser strength in naval estimates for the next ten years would depend on the results of the Five Power Naval conference.

Asked what increase or decrease in the number of cruisers for the next two five-year periods of the naval estimates would result from the number of cruisers at fifty, he replied: "There are at present 54 British cruisers built, and four others in an advanced stage of construction."

"The effect on the British estimates of fixing the total at fifty cruisers depends on the size of the cruisers laid down and the type of the cruisers built to replace those that become obsolete."

"The decision on these questions depends on the conclusions of the naval conference." "The decision on these questions depends on the conclusions of the naval conference."

Mr. Alexander gave to another question, the saving in the British naval estimates for the next six years would aggregate more than £20,000,000, if replacements of battleships as provided in article 20 of the Washington Treaty were deferred until 1936.

Mr. Alexander also told a questioner that decision as to proceeding with the three submarines remaining on the British 1929 naval program would be taken after the London conference had been concluded. The program originally provided for six submarines but three of these were dropped.

The recent cancellation of two British cruisers was of no material significance, Mr. Alexander told a questioner who asked the reason for the abandonment and the effect of the decision on the unemployment situation.

"The suspension of work on these ships," he said, "was decided upon by the Government on July 1st, for reasons of high policy only set out in a statement the prime minister made in the House of Commons, Jan. 14. As very little work was done on these ships on that date the recent decision to regard them as cancelled is of no material significance."

The first lord of the admiralty said it had not been necessary to reduce dockyard employment in consequence of stopping work on these and other ships.

"JAMAICA SUGAR"

London, England.—The attack on the wheat pool made by Mayor Webb, mentioned that Saskatchewan is proud of being the centre of Canada's greatest wheat province. He mentioned that he considered the wheat pool had done far more to create employment than to cause unemployment.

Strong protest against Mayor Webb's statements came from Ben Davies, of Stonewall, Man., secretary of the United Farmers of Manitoba. "These co-operative organizations came into existence through necessity," stated Mr. Lewis. "The farmers refused to produce grain at a loss, and insisted on a living wage. It is because agriculture is in such a low state that the whole country is suffering. Politicians come out into the street, talking of prosperity, while the very causes of the poverty — the farmers — are almost utterly stricken."

Almost unanimously, at the opening of a western "jobless party" called in Winnipeg, they stressed the grave conditions of the unemployed. They early aggravation of the situation, and opined that the Dominion Government should aid in unemployment relief.

WILL LEAD PROGRESSIVE GROUP

Governor-General Willingdon Thanks
All Those Who Helped To Make
Jamboree a Success

Ottawa, Ont.—Success of the Canadian Scouts' contingent who took part in last year's jamboree, in England, was due in large measure to the generous aid of Canadians, said the governor-general at Canada, His Excellency the Governor-General.

"To the generous subscribers in all parts of Canada to the special fund I personally raised for this purpose," said Viscount Willingdon, "I wish to express very warm thanks, and also to the various individuals who subscribed sums for individual boys, which largely increased the numbers of our contingent. I wish to thank, too, all members of the executive of the association here at headquarters, for their loyal, devoted work, very particularly the members of the jamboree committee, who, under the chairmanship of Colonel Stobie, made all the arrangements for this undertaking."

H. C. Nixon, who has been selected to lead the Progressive group in the Ontario House during the coming session.

Manitoba Beekeepers Meet In Winnipeg

Delegates Discuss Betterment of
Conditions Which Are Already
Excellent

Winnipeg.—Manitoba beekeepers in the 23rd annual convention at the Royal Alexandra Hotel, discussed ways and means of betterment of already excellent conditions under which this province holds a three-year record in the Dominion for first grade granulated and extracted honey. The report of the secretary, L. T. Floyd, gives Manitoba's entire crop estimate at 6,800,320 pounds of honey, with an average of 144 pounds per colony. There are 2,856 apiaries and the spring and fall counts respectively at 47,500 and 42,720 colonies. W. D. Wright, of Souris, Manitoba, representing the western and south of Brandon, from whence the finest grades come, was congratulated upon winning Dominion sweepstakes this year.

Toy Mullen, of Myrtle, was another outstanding beekeeper, having obtained 26,000 pounds from 100 colonies of bees.

Farm Home Destroyed

Fire Destroyed Home of
Father and Daughter Die From Burns

Kerrobert, Sask.—Burned terribly from neck to knees on both the front and the back of his body, through his heroic efforts to save his children, Lester Matters, Tramping Lake farmer, died in the Kerrobert hospital. He had been there for 24 hours, in intense pain.

His injuries were received when he practically destroyed his home following an early morning explosion, nine miles west of Tramping Lake. He and three children sustained heavy burns. An eight-year-old little girl, Nellie, aged 14 years, having succumbed to her injuries shortly after admission to the hospital.

Suggests Help For Byrd

New York, N.Y.—Dr. Howard T. Barnes, of McGill University, has suggested that chemicals might be used to hasten the break-up of the South Polar ice pack if Admiral Byrd desired it. The work would be done, Dr. Barnes said, by forcing one vital break in the pack at the key point and the manoeuvring an actual shifting of the ice masses.

Canadian Scouts Contingent

Governor-General Willingdon Thanks
All Those Who Helped To Make
Jamboree a Success

Ottawa, Ont.—Success of the Canadian Scouts' contingent who took part in last year's jamboree, in England, was due in large measure to the generous aid of Canadians, said the governor-general at Canada, His Excellency the Governor-General.

"To the generous subscribers in all parts of Canada to the special fund I personally raised for this purpose," said Viscount Willingdon, "I wish to express very warm thanks, and also to the various individuals who subscribed sums for individual boys, which largely increased the numbers of our contingent. I wish to thank, too, all members of the executive of the association here at headquarters, for their loyal, devoted work, very particularly the members of the jamboree committee, who, under the chairmanship of Colonel Stobie, made all the arrangements for this undertaking."

H. C. Nixon, who has been selected to lead the Progressive group in the Ontario House during the coming session.

Manitoba Beekeepers Meet In Winnipeg

Delegates Discuss Betterment of
Conditions Which Are Already
Excellent

Winnipeg.—Manitoba beekeepers in the 23rd annual convention at the Royal Alexandra Hotel, discussed ways and means of betterment of already excellent conditions under which this province holds a three-year record in the Dominion for first grade granulated and extracted honey. The report of the secretary, L. T. Floyd, gives Manitoba's entire crop estimate at 6,800,320 pounds of honey, with an average of 144 pounds per colony. There are 2,856 apiaries and the spring and fall counts respectively at 47,500 and 42,720 colonies. W. D. Wright, of Souris, Manitoba, representing the western and south of Brandon, from whence the finest grades come, was congratulated upon winning Dominion sweepstakes this year.

Toy Mullen, of Myrtle, was another outstanding beekeeper, having obtained 26,000 pounds from 100 colonies of bees.

Farm Home Destroyed

Fire Destroyed Home of
Father and Daughter Die From Burns

Kerrobert, Sask.—Burned terribly from neck to knees on both the front and the back of his body, through his heroic efforts to save his children, Lester Matters, Tramping Lake farmer, died in the Kerrobert hospital. He had been there for 24 hours, in intense pain.

His injuries were received when he practically destroyed his home following an early morning explosion, nine miles west of Tramping Lake. He and three children sustained heavy burns. An eight-year-old little girl, Nellie, aged 14 years, having succumbed to her injuries shortly after admission to the hospital.

Suggests Help For Byrd

New York, N.Y.—Dr. Howard T. Barnes, of McGill University, has suggested that chemicals might be used to hasten the break-up of the South Polar ice pack if Admiral Byrd desired it. The work would be done, Dr. Barnes said, by forcing one vital break in the pack at the key point and the manoeuvring an actual shifting of the ice masses.

MOVE MADE TO CHECK UP ON STOCK BROKERS

Winnipeg.—Across the prairie's sounded repercussions of the arrest of 10 Toronto brokers on charges of conspiracy to defraud. In Manitoba, Alberta and British Columbia, developments occurred in the move to check up on brokerage house activities throughout the Dominion.

Manitoba took the most drastic action of the day in the West, attacking bank accounts of unnamed brokers and adding to the list of companies under survey by province-appointed auditors. Early in January, the Manitoba Government initiated an audit in the Winnipeg office of Stobie Forling-Matthews, Limited, and Solloway, Mills and Company.

Voluntary action was taken, it was pointed out, because of the uncertainty which at present exists in the stock exchange trade, and because at present there was no means of ascertaining the exact status of the various firms.

Attorney-General W. J. Major, K.C., refused to name the firms whose bank accounts had been tied up at the order of the municipal corporation utility commission, and would not state into what new office auditors had been sent.

At Vancouver, following a special meeting of members of the Stock Exchange, an order was issued to the various brokerage firms, including Stobie, Forling-Matthews, Ltd., to cease from trading on the local market.

Traders for Solloway Mills were withdrawn by the company from the floor of the Calgary Stock Exchange. The company's assets were liquidated and been ordered, and affirmed that the move had been voluntary.

Attorney-generals of the western provinces are unwilling in their willingness to co-operate toward joint action by various provinces of the Dominion looking to uniformity in legislation. British Columbia, Alberta and Manitoba, have agreed to the Dominion conference on the matter and it is called. Saskatchewan, though in accord with the idea, will not be able to attend a party, owing to the coming session of the legislature.

At Calgary, Isaac W. Solloway and Harvey Mills, heads of the Solloway Mills' organization, in police court appear at preliminary hearings on five charges of fraud and conspiracy.

World Grain Show

Manitoba Agricultural Societies
Urged To Take An Interest In
Big Event

Winnipeg, Man.—Appeal to all societies to arrange at once for representation at the World Grain Show, at Regina, in 1932, was made by J. H. Evans, deputy minister of agriculture for Manitoba, in an address before the agricultural societies convention recently.

Every society in Manitoba should be represented at the show, said Mr. Evans. He rejected the interest manifested by junior seed growers in the production of better seed.

Endurance Test A Success

British Dirigible In Air For Fifty-
Three Hours

Cardington, Eng.—The dirigible R-100 returned to her home port after a successful endurance flight lasting 25 hours.

The giant airship during that time flew a zigzag course over the southern part of England, crossed the channel to the Scilly Islands, flew back over Plymouth, the Isle of Wight, the southern coast of Cornwall and once again over London. She started in misty weather and arrived home in a mist.

B.C. Honors Pioneer Women

Victoria.—The legislature of British Columbia, in its opening ceremonies paid tribute to the pioneer women of the province, who had helped lay the foundations of Canada on the Pacific. A dozen pioneer women occupied seats on the floor of the House, and received tributes on behalf of those they represented, the government and opposition.

Another Royal Wedding

Vienna.—Despatches from Bucharest say that the wedding of Princess Ileana, daughter of Dowager Queen Marie, to Count Alexander, of Pleasa, has been fixed for the second half of February.

CHAMPION CHATTER

No. 60

Published in the interests of the People of Champion and Farmers of this vicinity.

GEO. L. DUPUE, Editor.

LIKE LINERORS? Here's a five-line Liner with the last line omitted. Fill it in to suit yourself and win the fur-lined bathtub. A motorist named Ebenezer bought a case for his wife just to please her. But this ignorant Jill Passed a car on the hill

Do not take our word for it. We are expected to boost our line, but if you want to get the truth about Mc-Dug Front Seat Delivery Trucks, ask any owner in this vicinity. We shall rest our case on what they say.

America's chewing gum bill last year was over \$100,000,000, exclusive of the cost of gasoline to remove it from the trunks.

Our sincere sympathy

"Good Equipment Makes a Good Farmer Better."

goes out to the Ashmore family in their and bereavement.

You know that automobiles were never really successful until they got away from the plain bearings, such as were used in the old buggy wheels, and adopted ball bearings, which would stand the higher speeds and harder service. Trouble with high-grade ball bearings is practically negligible, so that they are far cheaper in the long run, though they cost more in the first place.

That's why Mc-Dug Tractors have them on their big crankshafts—they last for years with no adjustments or attention whatever.

Speaking of gum reminds us that one of America's prominent gum manufacturers known to have played with chew chew cars when he was young.

Louis Fath has placed an order for a 2230 Mc-

Dug Tractor, also a set of Moon Tracks for it.

Folks for goodness sake don't lose sight of the fact when buying a tractor or other machinery that some day you are going to want some service on it. Will the people you are buying from be at your door when that time comes as we are? Think this over.

The only man in the British Isles who isn't worrying about the price for the Prince of Wales is the Prince.

Whether you want an electric drive, an engine drive, or an 'elbow' drive, we can supply you with a Mc-Dug Ball - bearing Cream Separator that will fit your needs.

U. C. Board Reorganized

An enthusiastic meeting of the supporters of the United Church met in the Community hall on Wednesday evening with a large attendance, which included representatives from the different organizations connected with church work. The chairman of the Board, G. F. Smith, had the misfortune to leave his spectacles at home and his place was taken very satisfactorily by R. I. Baker. Reorganization of the Church Board was effected, the following being elected: G. F. Smith, J. D. McDougall, Mrs. W. Ulrich, J. S. Collins and A. McCullough. U. S. Alexander was re-elected secretary. A short program and a banquet served by the Ladies' Aid were features of the occasion. A report of the year's work was presented by the secretary and approved. A big effort will be made during 1935 to promote renewed interest in church affairs and in the competent hands of the new board no doubt outstanding success in this direction will be achieved.

Harmony Electors Meet Feb. 15th

The annual meeting of the ratepayers of the Municipal District of Harmony will be held in the Community Hall, Champion, on Saturday, February 15th, commencing at 1 o'clock. Business will include the nomination of councillors in two divisions, at least.

A curling contest of the first importance will be pulled off as soon as ice conditions will permit. The contestants include all the real curling ability to be found in the club and the trophies to be provided are interesting, to say the least. Further information will be given when the weather shows some sign of less tropical conditions. Curling talk don't sound right just now.

A Valentine dance will be held on Friday, Feb. 14th, in the Community Hall under the auspices of the women of the Royal Purple. Music will be furnished by a five-piece orchestra which will specialize in snappy dance numbers. The admission will be \$1.50 per couple and it is anticipated the capacity of the hall will be required for the occasion.

Farmers' Hardware would like to hear from a pump rod stock and die and also a 24-inch Sullion wrench which were borrowed some time ago and have not been returned. Please make it a point to return these tools. They are needed badly.

Local and General

K. R. McLean, R.O. of McLean & Anderson, Sight Specialist 208-8th Ave West, Calgary will make his monthly visit to Champion Friday, February 28, at the Drug Store.

W. M. Isaacson and family have moved from town back to the farm.

A large number of members of Carmangay Chapter O.E.S. were here for the visit of the Grand Matron on Monday evening.

The Ladies' Aid met at the home of Mrs. J. O. Bell on Thursday afternoon. The next meeting will be held at the home of Mrs. Woodhall.

While he was in the hospital \$85 was taken from the home of Dan McAulay while the house was unoccupied.

T. Sisson is receiving congratulations on his recovery from a severe attack of pneumonia. The Chronicle hastens to join in the felicitations.

Mrs. Neil McLeod is spending the week in Calgary, while Mr. McLeod is on a buffalo hunt at Banff.

Mrs. J. O. Bell entertained to dinner on Monday the guests being Miss Max Gibson, G.W.M. of the O.E.S., of Leithbridge, Mrs. Wray, Mr. and Mrs. J. M. Roebuck and Mrs. O. Hagg.

Mrs. W. E. Watkins returned from a visit to Carleton.

The first W.I. card party of the season was held in the community hall on Friday evening, Jan. 31st. Twelve tables were in play the prizes being won by Miss Cameron and Mr. Granlin in the first division, the consolation going to Miss Elsie McLean and Donald Stephenson.

A special inspectional visit this week promises a solution of the difficulties of the Hiawatha school district.

The Little Bow bonspiel is scheduled to take place at 11:00 a.m. on Monday and Tuesday, Feb. 10 and 11.
